

2. A composition as claimed in claim 1, wherein the itchiness condition is caused by psoriasis.
 3. A composition as claimed in claim 1, further comprising aloe vera.
 4. A composition as claimed in claim 1, comprising propylene glycol.
 5. A composition as claimed in claim 1, wherein the oil comprises an hydrogenated vegetable oil.
 6. A composition as claimed in claim 1, wherein the lipid includes an effective amount of liponate, lipomulse, lipocol and lipowax.
 7. A composition as claimed in claim 1, comprising effective amounts of propylene, glycol, aloe vera, liponate, and wherein the oil includes hydrogenated vegetable oils and sunflower oil and including stearic acid, lipomulse, and eugenol.
 8. A composition as claimed in claim 1, comprising at least about 5% Dead Sea salts.
 9. A composition as claimed in claim 1, comprising suitable sunscreen.
-

B2 10. (Twice Amended) A composition comprising a mineral salt emulsified and dispersed in water, [a] the mineral salt, preferably being a composition of Dead Sea salt, having as active ingredients Magnesium Chloride, Potassium Chloride, Sodium Chloride [and] water, a lipid soluble compound, and oils, the composition having components present in sufficient quantities to at least partly effectively protect the tissue within the mouth against an adverse condition and a suitable carrier for permitting formulation as a product for use in the mouth, preferably a toothpaste, cream or mouthwash.

11. A composition as claimed in claim 1, comprising a solvent component for the mineral salt, a preservative component, thickener component, hydrophilic component, and a pigment.

12. A composition as claimed in claim 1, comprising about 5% Dead Sea salt, 70% dionized water, and 3% propylene glycol.

13. (Twice Amended) A skin composition comprising a mineral salt emulsified and dispersed in water, [a] the mineral salt, preferably being a composition of Dead Sea salt, having as active ingredients Magnesium Chloride, Potassium Chloride, Sodium Chloride [and] water, a lipid soluble compound, and oils, the composition having components present in sufficient quantities to at least partly effectively protect the skin tissue against [a condition against] psoriasis.

14. A composition comprising mineral salts, preferably Dead Sea mineral salts, for selectively exfoliating or scrubbing living tissue such as skin, the composition including a water soluble base, the water soluble base being a non-oily element for retaining the mineral salt elements, preferably in granular form, whereby the granules are effectively exfoliating or scrubbing agents on tissue.

15. A composition as claimed in claim 14, wherein a sufficiently minimum amount of water is used in the formulation of the composition such that the mineral salt granules are inhibited from break down in the formulation and prior to use as an exfoliating or scrubbing agent.

16. A composition as claimed in claim 14, wherein the scrubbing agent includes silica or pumice.

17. A composition as claimed in claim 14 comprising safflower oil, lipocol glycerin and propylene glycol.
